

# The State of AI: We're Not in Kansas Anymore

Artificial intelligence (AI) is no longer artificial, yet many talent and business decision makers do not fully recognize how AI-driven innovations are influencing the world. Still think of AI as science fiction? Think again.

- ⚙️ **"Voice assistant software is the #1 AI app today."**
- ⚙️ **"AI bots will power 85% of customer service interactions by 2020."**
- ⚙️ **"Digital assistants will 'know you' by 2018."**
- ⚙️ **"Get excited for self-driving cars."**
- ⚙️ **"20% of business content will come from AI by 2018."**
- ⚙️ **"AI drives a \$14 trillion to \$33 trillion economic impact."**
- ⚙️ **"Machines will be smarter than us by 2029."**
